How To Connect To Your Wireless Network

Mac OS X
1. Click on the **wireless icon** located in the top right hand corner of your desktop screen.

2. Locate and select your wireless network from the network list by clicking on the name of the network.
3. Enter your network password 4. Click “OK”
5. Wait for your computer to connect to your wireless network

6. You’ve successfully connected to your wireless network when you see a check next to the name of your network.
