Manager III – Planning & Capacity
Hawaiian Telcom, Inc.
1177 Bishop St., Suite A13
Honolulu, HI 96813
808-546-4770
ryan.mock@hawaiiantel.com

Implementation Date: On or after November 1, 2024

Planned Network Changes will occur at selected locations in the following wire center area in Hawaii:

Hawaiian Telcom Wire Center	Address	CLLI
Alakea Central Office	1177 Bishop St, Honolulu 96813	HNLLHIMN

Exhibit A to this copper retirement notice provides a list of specific address ranges and streets in the wire center serving area at which copper network facilities will be retired. Hawaiian Telcom’s copper retirement notices may be viewed on its website at www.hawaiiantel.com/networkdisclosures.

Description of the Planned Network Change(s):

Hawaiian Telcom intends to retire copper facilities at locations in the wire center serving area listed in the attached Exhibit A that are currently served by the Liliha and Pacific Heights pair gains in the Alakea Central Office. Hawaiian Telcom has deployed its fiber network infrastructure to the locations listed in Exhibit A and intends to provide services over fiber to these locations. Updating Hawaiian Telcom’s network from copper to fiber benefits customers because of fiber’s resiliency and reliability, especially in inclement weather. Fiber also provides customers with expanded capabilities to accommodate growing bandwidth demands for their home or business.

Description of reasonably foreseeable impact(s) of the planned change(s):

After the implementation date listed above, Hawaiian Telcom will: (1) no longer offer services over copper facilities; and (2) cease maintaining the copper facilities.

To help ensure an orderly transition, Hawaiian Telcom may require customers and interconnecting entities to migrate services off copper facilities well before the copper retirement Implementation Date.

Description of any changes in prices, terms, or conditions that will accompany the planned change(s):

As a general matter, the retirement of copper facilities will not result in changes to rates, terms, and conditions in cases where the affected service is converted to a like-for-like service that is available on fiber facilities. Interconnecting entities, however, should review the applicable tariff or agreement for certain terms that may apply specifically in cases where the service is provisioned on fiber.

In cases where interconnecting entities elect to replace the affected service with an alternative service that Hawaiian Telcom offers on fiber facilities, the rates, terms and conditions will be as set forth in the tariff, associated Service and Rate Guide or agreement under which Hawaiian Telcom offers the replacement service.
