

# COLOCATION SERVICES

## ENDEAVOR DATA CENTER

### Flexible and Secure Colocation for your Business

For most businesses, colocation is about more than simply renting rackspace and the power to operate it. With Endeavor, we provide our customers with a protected, full-service environment, with physical colocation, virtual colocation, Internet services, offsite backup services, and local engineering support. Customers have the choice of employing a turnkey solution that is custom-designed by Hawaiian Telcom, or an à la carte solution using their own preferred carriers and vendors. Endeavor is a carrier- and vendor-neutral colocation environment that maximizes flexibility for our customers.

### Endeavor Data Center Features

#### Facility Specifications

- Uptime Guarantee on power and environmental controls
- Geographically favorable location outside of flood and emergency evacuation zones
- Colocation space located on second floor, increasing security and environmental protection
- 24x7 on-site security coverage

#### Services

- Network connectivity
- Full cabinet colocation
- Custom cage colocation
- Professional design services

*"protected, full-service environment.."*  
*"turnkey solution.."*
