Senior Manager – Network Engineering & Planning
Hawaiian Telcom, Inc.
1177 Bishop St. Suite #6
Honolulu, HI 96813
808-546-4770
ryan.mock@hawaiiantel.com

Implementation Date: On or after May 20, 2022

Planned Network Changes will occur at selected locations in the following wire center area in Hawaii:

Hawaiian Telcom Wire Center	Address	CLLI
Kalihi Central Office	1025 Kaili St, Honolulu 96819	KLHIHICO

Exhibit A to this copper retirement provides information about the specific range of addresses and streets in the wire center serving area at which the copper network facilities will be retired. Exhibit A may also be viewed on Hawaiian Telcom's website at <https://www.hawaiiantel.com/wholesale/Wholesale/Resources/Documentation>.

Description of the Planned Network Change(s):

Hawaiian Telcom intends to retire copper facilities at locations in the wire center serving area listed in the attached Exhibit A that are currently served by the Kalihi Valley pair gain in the Kalihi Central Office. Hawaiian Telcom has deployed its fiber network infrastructure in the locations listed in Exhibit A and intends to provide services over fiber to these locations. Updating Hawaiian Telcom's network from copper to fiber benefits customers because of fiber's resiliency and reliability, especially in inclement weather. Fiber also provides customers with expanded capabilities to accommodate growing bandwidth demands for their home or business.

Description of reasonably foreseeable impact(s) of the planned change(s):

After the retirement of the copper facilities, Hawaiian Telcom will: (1) no longer offer services over copper facilities; and (2) cease maintaining the copper facilities.

Description of any changes in prices, terms, or conditions that will accompany the planned change(s):

As a general matter, the retirement of copper facilities will not result in changes to rates, terms, and conditions in cases where the affected service is converted to a like-for-like service that is available on fiber facilities. Interconnecting entities, however, should review the applicable tariff or agreement for

certain terms that may apply specifically in cases where the service is provisioned on fiber. In cases where interconnecting entities elect to replace the affected service with an alternative service that Hawaiian Telcom offers on fiber facilities, the rates, terms and conditions will be as set forth in the tariff and its associated Rate Guide or agreement under which Hawaiian Telcom offers the replacement service that the interconnecting entity selects. To help ensure an orderly transition, Hawaiian Telcom may require customers and interconnecting entities to migrate services off copper facilities well before the copper retirement implementation date.
