

PUBLIC NOTICE OF COPPER RETIREMENT UNDER RULE 51.333

**Public Notice No. 24-001: Locations Served by the Kalihi Central Office
Impacted by the Construction of the Skyline Rail System**

March 21, 2024

Carrier: Hawaiian Telcom, Inc. ("Hawaiian Telcom"), 1177 Bishop Street, Honolulu, HI 96813

Contact: For additional information on these planned network changes, please contact:

Jonathan Delahoyde
Senior Manager, Strategy and Fiber Deployment
Hawaiian Telcom, Inc.
1177 Bishop St. Suite 15
Honolulu, HI 96813
808-345-0061

Implementation Date: On or after July 15, 2024

Planned Network Changes will occur at selected locations in the following wire center in Hawaii:

Hawaiian Telcom Wire Center	Address	CLLI
Kalihi Central Office	1025 Kaili Street, Honolulu HI 96819	KLHIHICO

Exhibit A to this copper retirement notice provides a list of specific addresses and streets in the wire center serving area at which copper network facilities will be retired. Hawaiian Telcom's copper retirement notices may be viewed on its website at www.hawaiiantel.com/networkdisclosures.

Description of the Planned Network Change(s):

Due to planned construction activities currently underway by the Honolulu Authority for Rapid Transportation ("HART") for segments of the Skyline rail system, Hawaiian Telcom intends to retire copper facilities at specified locations served by the Kalihi Central Office. Hawaiian Telcom has deployed or plans to deploy a fiber-to-the-premises network to the locations listed in Exhibit A and provide services over this fiber network. Copper has increasingly become more difficult and expensive to maintain as manufacturers migrate away from older technologies making spare parts difficult to find with long lead times. Cost effective fiber solutions provide customers with better resiliency and expanded capabilities to accommodate growing bandwidth demands for their home or business. Furthermore, Hawaiian Telcom's fiber-delivered broadband services are at least 100 times more efficient on a kilowatt hour (kWh) per gigabyte basis than its copper-delivered broadband.

Description of reasonably foreseeable impact(s) of the planned change(s):

After the Implementation Date listed above, Hawaiian Telcom will: (1) no longer offer services over copper facilities; and (2) cease maintaining the copper facilities.

To help ensure an orderly transition, Hawaiian Telcom may require customers and interconnecting entities to migrate services off copper facilities well before the copper retirement Implementation Date.

Description of any changes in prices, terms, or conditions that will accompany the planned change(s):

As a general matter, the retirement of copper facilities will not result in changes to rates, terms, and conditions in cases where the affected service is converted to a like-for-like service that is available on fiber facilities. Interconnecting entities, however, should review the applicable tariff or agreement for certain terms that may apply specifically in cases where the service is provisioned on fiber.

In cases where interconnecting entities elect to replace the affected service with an alternative service that Hawaiian Telcom offers on fiber facilities, the rates, terms and conditions will be as set forth in the tariff, associated service and rate guide or agreement under which Hawaiian Telcom offers the replacement service.
