

Dedicated Ethernet Services

Cost-effective, Secure, and Reliable.

Hawaiian Telcom Dedicated Ethernet Services (DES) provides Ethernet based point-to-point communications. DES is a fully managed, private, low latency high-bandwidth and cost-effective point-to-point solution that is secure and reliable.

Business Applications

- Financial, healthcare or retail where a private secure connection is required
- Ideal for data center connectivity
- Disaster recovery and business continuity solutions
- Compliance – Ensure network segregation to meet compliance requirements such as PCI & HIPPA
- Low latency, high bandwidth data transport
- Scalable – Increase bandwidths as needed

Benefits

- **Private Line** – Secure and dedicated physical network infrastructure
- **Network Simplification** – Ethernet handoff for a simplified private line connection
- **Scalable Bandwidth** – Ethernet Bandwidths from 10Mbps to 100Gbps
- **Local Support** – 24/7 Customer Support
- **Availability** - Statewide
