

A background image of a woman with long dark hair, wearing a light blue button-down shirt, smiling while working on a laptop. The image has a blue tint. On the right side, there is a large, white, stylized graphic of a traditional Hawaiian headdress (pili) with intricate patterns.

Hawaiian Telcom SafeGuard for Business

As the keeper of vital customer information, your business is responsible for ensuring that the data in your computers are kept safe from loss or theft. Hawaiian Telcom SafeGuard for Business, powered by F-Secure, shields your business and customers against everything from advanced cyber attacks and data breaches to widespread infections. Typically part of expensive, on-premise security systems for large companies, SafeGuard for Business is a robust security solution that's ideal for small and medium-sized businesses.

Features

- Coverage of essential elements of security - protection against known vulnerabilities as well as emerging threats.
- Robust security for Windows and macOS workstations, iOS and Android mobile devices, and Windows and Linux servers.
- Streamlined security management across multiple devices.

Benefits

- SafeGuard analyzes server reputations and behaviors when browsing and warns you if websites are safe, unsafe or unknown.
- Powerful host-based firewall protects your host machine if your perimeter firewall is breached.
- Automatic third-party software patching of known vulnerabilities.

A comprehensive solution for protecting your business' devices and data.

Protection Service for Business Portal. SafeGuard makes it easy to deploy, manage and monitor security across your IT network. You manage everything from a single, intuitive web portal using graphical dashboards that are accessible 24/7 from anywhere. SafeGuard is Cloud-based, so there's no need to buy or maintain a management server.

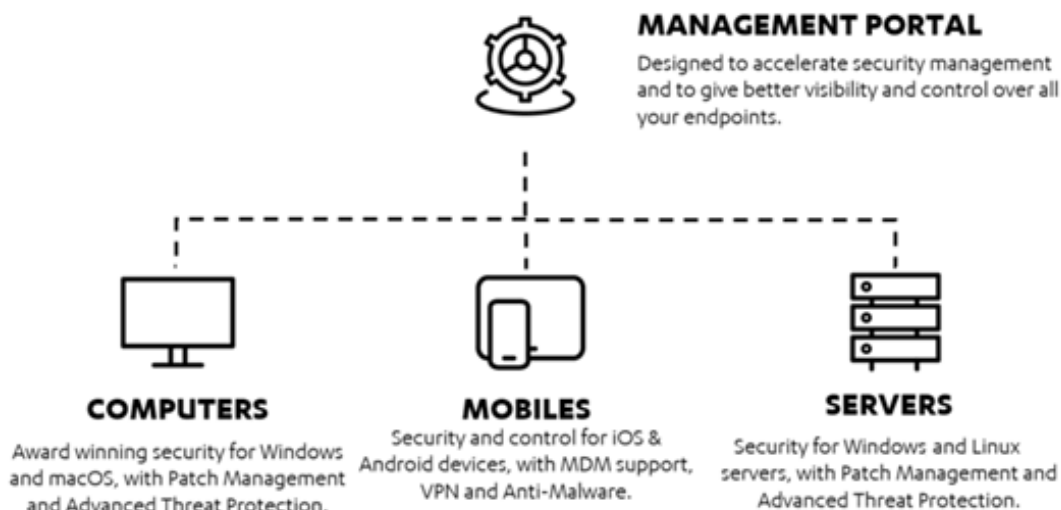

Computer protection. Remote computers and other devices that communicate with your network are the most vulnerable links in your IT network. SafeGuard uses multiple scanning engines — including a host-based firewall, anti-malware and web protection — to fend off cyber threats and secure your Windows and macOS endpoints behind layers of protection.

Server protection. SafeGuard offers powerful, advanced security for Windows servers in larger product bundles. A multi-layered approach with real-time threat intelligence and Cloud management prepares your business for the rigors of the modern security landscape*.

Mobile device protection. SafeGuard gives you the features mobile users need for security, including protection against malware and data interception when using public WiFi and mobile networks here or around the world. You also get traffic compression and online tracking prevention for up to 30% faster browsing.

A Cybersecurity Partnership

Hawaiian Telcom has partnered with cyber security leader F-Secure to provide you with award-winning Internet security protection. With unsurpassed experience in endpoint protection as well as detection and response, F-Secure has a 30-year history of shielding tens of thousands of companies and millions of consumers against everything from advanced cyber attacks and data breaches to widespread infections.

Together, we're on a mission to make sure Hawaii companies have access to the same enterprise-grade cyber security that protects the world's leading companies against the full range of cyber threats.
