All of Hawaiian Telcom's copper retirement notices may be viewed on Hawaiian Telcom's website at

<https://www.hawaiiantel.com/wholesale/Wholesale/Resources/Documentation>.

Description of the Planned Network Change(s):

Hawaiian Telcom intends to retire its copper facilities at all locations in the wire centers listed above. Hawaiian Telcom has deployed or plans to deploy its fiber-to-the-premises network in these areas and intends to provide services over a fiber network infrastructure. Copper is more difficult and expensive to maintain as manufacturers migrate away from this older technology making spare parts difficult to procure. Cost-effective fiber solutions provide customers with better resiliency and expanded capabilities to accommodate growing bandwidth demands for their home or business. Furthermore, Hawaiian Telcom's fiber-delivered broadband services are at least 100 times more efficient on a kilowatt hour (kWh) per gigabyte basis than Hawaiian Telcom's copper-delivered broadband services.

Description of reasonably foreseeable impact(s) of the planned change(s):

After the retirement of the copper facilities, Hawaiian Telcom will: (1) no longer offer services over copper facilities; and (2) cease maintaining the copper facilities

To help ensure an orderly transition, Hawaiian Telcom may require customers and interconnecting entities to migrate services off copper facilities well before the copper retirement implementation date.
