## Captive Portal login

## Tools designed for your business

With Fioptics Advanced WiFi, you have access to a new suite of management tools to manage and control your network.

### Multiple SSIDs

Multiple SSIDs allow businesses to keep employee and business critical devices secured by segmenting them from other connected devices on the network.

### Captive portal

Captive portal enables businesses to create a branded guest wifi experience for its visitors. With included access controls, businesses can define connection times, bandwidth limits, and set user session restrictions.

### Public static IP

With public static IPs, businesses can assign multiple static public IP addresses to devices, simplifying routing and management.

### Insight for business owners

eero Insight is a web portal that empowers businesses with easy network management and real-time insights for optimal performance.
