

# Hosted Unified Communications with Webex

Your business communications are about to get a lot simpler.

Webex brings together your teams, your customers, and your work, all the time, everywhere. Call, message, meet, and share.

- **Any device.** Webex works on PC and Macs, as well as iOS and Android tablets and smartphones giving you the option to choose how you want to work.
- **Always secure.** Webex keeps your information safe and secure with end-to-end encryption.
- **Single number reach.** Publish one business phone number and all your business calls will go to the device of your choice: desktop, tablet, or smartphone.

## Messaging Features

- **Messaging capabilities.** Messaging and file sharing integrated with your content and workflow.
- **Presence status.** Smart presence lets you know when your colleagues' available, removing the guesswork from communicating.
- **External Collaboration.** Collaborate with people outside your company by adding external parties directly to spaces.

## Meeting Features

- **Personal meeting room.** Enjoy your own private and secure online meeting room with a dedicated phone number
- **Recordings.** Record meetings for people who can't attend or for those who want to refer back to what was discussed.

## Intelligent Collaboration

- **File sharing.** Simply drag and drop files with a colleague or in a space for your whole team and the files you receive are neatly organized, searchable, and saved.
- **Intuitive search.** Easily search across spaces, people, messages, and files to find what you need.
